CNATRA INSTRUCTION 5442.8E

Subj: MAINTENANCE CONTRACTOR OPNAV XRAY REPORTING AND ENGINE
       TRANSACTION REPORTING PROCEDURES

Ref: (a) CNAFINST 4790.2A
       (b) NAVAIRINST 13700.15E

1. Purpose. To publish procedures for contractor maintenance
activities ('O', 'I' and "D' Level) in the reporting of Office
of the Chief of Naval Operations (OPNAV) XRAY reporting per
reference (a), and Engine Transaction Reporting (ETR) per
reference (b).
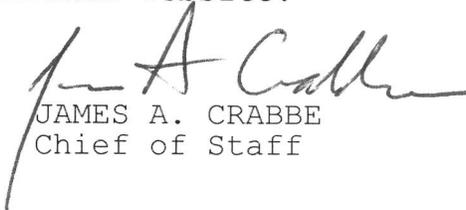

2. Cancellation. CNATRAINST 5442.8D

3. Background. The Aircraft Inventory Readiness Reporting
System (AIRRS) and the Decision Knowledge Programming for
Logistics Analysis and Technical Evaluation (DECKETR) allows for
source data entry of XRAY and ETR information. This alleviates
the requirement for naval message reporting for XRAY and ETR
data. Chief of Naval Air Training (CNATRA) Detachments have
computer access to these databases for the purpose of data
input.

4. Action

    a. Maintenance Contractor. XRAY reports shall be generated
per reference (a) and ETR Reports will be generated per
reference (b). Upon determination of requirement for an XRAY
report or an ETR, forward a facsimile copy of the OPNAV XRAY
and/or ETR to the cognizant CNATRA Detachment (N4).

    b. CNATRA Detachment Officer In Charge/Training Air Wing
Maintenance Officer. Upon receipt of OPNAV XRAY reports and/or
ETR from the Maintenance Contractor, ensure report data is
keypunched into the AIRRS and/or DECKETR databases. This
instruction does not apply to Action Code 'S' XRAY reports.
Action Code 'S' XRAY Reports will be sent via naval message.

5. Reports. The Aircraft XRAY Report has Report Control Symbol
(RCS) OPNAV 5442-1 (MIN: CONSIDERED), the Quarterly Hours In
Life Reporting is via AIRRS website (MIN: CONSIDERED), and the
ETR via DECKETR through the DECKPLATE website.

                              JAMES A. CRABBE
                              Chief of Staff
